Slow Economic Recovery

Quarterly Change in U.S. Real GDP

Source: Bureau of Economic Analysis

I don't think anyone fully understands yet how much damage was done to the U.S. economy by the events of September 2008.

Daniel Henninger

WSJ 9-10-09

• The talk about “the new normal”?

Bill Gross

The world has changed since early '08 or even '09. The next 10 years will involve deleveraging, re-regulation, and deglobalization. Countries will become more protective in terms of mild tariffs or currency devaluation. The result is a "new normal" of slower growth in the U.S. and global economies.

If an economy grew at 3% to 4% annually over the last 10 years, then it'll grow at 1.5% to 2% over the next 10. We expect returns will be half of what they were in the past decade.

Jeremy Siegel

I reject Bill Gross's thesis of the "new normal." I don't believe we'll see slow growth. You have to talk about productivity growth, and that depends on innovation and research. We may be entering a golden age of such innovation because of the explosion of the Internet and international communication. That's what produces breakthroughs.

Some simple math about “Jobless recovery” and KY agriculture

- **What is the official definition of a “farm”?**

“any operation that sells at least \$1000 of agricultural commodities or would have sold that amount of produce under normal circumstances.”

KY = ~ 85,000 “farms”

***Some simple math about
“Jobless recovery” and KY agriculture***

- **\$22,050 Poverty level income, family of four**
\$100,000 gross sales x .2 = \$20,000
~6,000 farms in KY
- **\$41,538 Median household income in KY**
\$207,500 gross sales x .2 = \$41,500
~3,000 farms in KY

**Don't forget where the
financial crisis began...**

Home Prices Edge Up But Outlook Darkens

WSJ 9-29-10

By SARA MURRAY

Home prices rose for the fourth-straight month in July, but at a slower pace than in previous months, and they could start falling again as the expiration of government home-buying incentives has put a brake on sales.

employment has consumers worried, making them hesitant to wade into the home market, particularly now that home-buyer tax credits have expired. Such scenarios often lead to a standoff with sellers, who are reluctant to drop prices. Meanwhile, distressed properties continue to make their

Lengthening Limbo

Nationwide, the average time it takes for a homeowner who defaults on a mortgage to actually lose the property through a foreclosure has increased 75 percent since 2008. That is largely because of legal challenges, government pressure to work with borrowers and the sheer volume of problem mortgages.

This cannot be “normal”...

Debt Markets

IBM raised **\$1.5 billion** by selling three-year notes at an interest rate of 1 percent, the lowest on record. Big Blue's bond sale signals that the corporate debt rally that began in June is extending into August. Companies sold \$90.1 billion of bonds in the U.S. in July, the biggest total for that month in more than a decade.

Outlook for 2011

- Frustratingly low economic growth.
- Jobless recovery for 2-3 years.
- Low interest rates, at least for one more year.
- +/-1.5% inflation, risk of deflation
- Massive federal deficits limit policy options, squeeze programs.

ECONOMIC FORECASTS

GDP growth

Slow growth -- +1.5% to 2.5%

Interest rates

Remain low – Prime to 3.75% - 4% by summer 2011

Inflation

Low in near term; risk of deflation

Energy Prices

Crude oil trends in \$75-\$85 range; natural gas price remains low

Unemployment

Slowly declining over 2-3 years; jobless recovery

Trade deficit

Large but manageable

Budget deficit

Another near-record high of \$1.3T declines to \$1T in 2011

Macroeconomic Impacts on Ag Policy

- Potential political change in the Congress will change Ag Committee leadership.

Macroeconomic Impacts on Ag Policy

- Potential political change in the Congress will change Ag Committee leadership.
- Budget deficits will impact current programs and the next Farm Bill. Budget reconciliation in 2011? Traditional coalition between poverty/nutrition groups and farm groups to pass a Farm Bill in 2012?
- Tea Party influence in Congress – serious about taxes and spending?
