Strengthening the Evidence Base for Accreditation: Progress in PHSSR and PBRNs

Glen P. Mays, PhD, MPH
University of Kentucky

PHAB Research Advisory Council • Alexandria, VA
11 September 2013
Developmental path for PHSSR

- Measuring practice & performance
- Detecting variation in practice
- Examining determinants of variation
  - Organization
  - Financing
  - Workforce
- Determining consequences of variation
  - Health outcomes
  - Economic outcomes
- Testing strategies to reduce *harmful*, *wasteful*, & *inequitable* variation in practice and outcomes
PBRN Research Streams

- Delivery System Organization and Structure
- Practice Variation
- Volume, Intensity, and Quality of Delivery
- Cost of Delivery
- Value and ROI of Public Health
Critical research issues in Accreditation & QI

- Did “it” work?
- Are you sure that it worked?
- For whom did it work (and for whom not)?
- How did it work (or why did it not)?
- What were the active ingredients?
- Were there unintended effects?
- Were the effects worth the costs?
- How long can the effects be sustained?
- Can it be replicated in other settings?
- Comparison to other QI methods (CER)?
Research challenges in accreditation and QI

Design and attribution
- Selection effects
- Hawthorne effects
- Other temporal changes
- Regression to the mean
- The counterfactual?

Measurement
- Are we measuring the right things?
- Sensitivity & specificity
- Common source bias
- Is there enough time to observe changes?

Intervention Exposure
- Fidelity
- Implementation cost
- Comparative effectiveness of alternative strategies
- Dose-response
- Context-specific effects (treatment heterogeneity)
PHSSR & PBRN research on accreditation

- Interest, intent, and incentives to seek accreditation
- Prerequisites for accreditation
  - CHA/CHIP practice variation
- Capacity for accreditation & QI
  - Multi-jurisdictional models
- Impact of state-based accreditation approaches
  - North Carolina
  - Missouri

</table>
Examples: Regionalized Service Delivery

- **Massachusetts**: Local variation in decision-making and implementation regarding regional delivery models

- **Nebraska**: How do organizational design and workforce issues affect implementation of regional health department models

- **Connecticut**: How do state-mandated services and funding reductions influence decision-making regarding regional models

- **Colorado**: Impact of state public health law reform on regional approaches to service delivery; variation in local legal instruments and approaches to regionalization
Current and emerging research priorities

- Comparative studies of public health delivery: volume, intensity, quality, efficiency
- Cost estimation
- Value and ROI studies
