This Report is brought to you for free and open access by the Biosystems and Agricultural Engineering at UKnowledge. It has been accepted for inclusion in Agricultural Engineering Extension Updates by an authorized administrator of UKnowledge. For more information, please contact UKnowledge@lsv.uky.edu.
CERTIFIED DRINKING WATER TESTING LABORATORIES
(1989 Update)

Joseph L. Taraba
Associate Extension Professor and
Extension Specialist for Agricultural Engineering

The following is a list of testing laboratories certified by the Commonwealth of Kentucky for the testing of drinking water through the Department of Environmental Protection, Division of Water, Drinking Water Branch. The areas of certification have been noted for each laboratory. This list is complete as of September 18, 1989.

The certification means that the testing procedures, laboratory facilities, and proficiency of testing meet state standards. Contact the laboratory before sampling the water. The laboratory will supply a sampling container (or suggest a type of container to use) and explain the procedures for taking a water sample for each type of test requested. Follow the procedures exactly so that the laboratory results from the water sample will be accurate.
