Generalized Geologic Map for Land-Use Planning: Harrison County, Kentucky

Daniel L. Carey and Richard A. Smith

Acknowledgments
Geology, Appendices: Brian Begg, Stephen Bernadette, Sarah Breed, Erika Dyer, Abigail Goodwin, Sam Ham, and Lauren Jenkins. For Planning Use Only.}

For more information, see Potter (1996).

---

Land-Use Planning Table Definitions

Formation and Erosion

type 1, 2, 3...: These are the landform categories for erosion/deposition zones in the United States, where type 1 is the highest elevation and type 3 is the lowest.

Slight limitations: Slight limitations, rock excavation.

Slight to moderate: Slight to moderate limitations, rock excavation.

Severe to slight: Severe to slight limitations, rock excavation.

Severe to moderate: Severe to moderate limitations, rock excavation.

Severe to high: Severe to high limitations, rock excavation.

SEVERE TO HIGH LIMITATIONS

NOT RECOMMENDED

---

Water Resources

Water Resources include all water sources, both surface and groundwater, that are used for domestic, agricultural, or industrial purposes. In some areas, water resources are restricted due to the presence of karst geology, which can lead to water-related problems such as sinkholes and underground springs.
