This new directory focuses on "direct care/services to persons infected and/or affected by AIDS." Arranged by the ten Department of Health and Human Services Regions, then alphabetically by state (poorly reproduced maps act as guides to the regions and states), the entries give basic contact information: names, addresses, phone numbers, etc. The very broad coverage includes health departments, HIV testing sites, medical services, home health care, education, research, and community-based agencies. There are, however, notable regional and local omissions. This guide, with its planned annual updates, may be useful to libraries with an audience requiring nationwide access to local and regional services, but many others will find the national and state hotlines (also listed) a more up-to-date and cheaper resource.
