Selected KGS reports published before 1999 have been scanned and converted to PDF format. Scanned documents may not retain the formatting of the original publication. In addition, color may have been added to some documents to clarify illustrations; in these cases, the color does not appear in the original printed copy of the publication. Every effort has been made to ensure the integrity of the text. KGS maps and charts are supplied either whole or in part and some are too large to be printed on most plotters. Open-file reports are reproduced from the best available copy provided by the author, and have not undergone KGS technical or editorial review.
