INTERPRETATION

DESCRIPTION

In C19: Serpulid tubes line bedded and laminated, locally silty, lens of horsetail conglomerate in limestone.

In C20: Calcareous dolomite, grey, with thin layers of dolomitic limestone and argillaceous dolomite.

In C21: Fine, medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C22: Fine, medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C23: Fining-upwards succession from fine, medium and coarse dolomite.

In C24: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C25: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C26: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C27: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C28: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C29: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C30: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C31: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C32: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C33: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C34: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C35: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C36: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C37: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C38: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C39: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.

In C40: Medium and coarse dolomite, with thin layers of dolomitic limestone and argillaceous dolomite.
