**Supplementary Figure: Full-length western blot images for Figures 8A, 9B and 9D.**

A). Full-length western blots to show CD47 protein levels in brown adipose tissue from LF or HF fed WT mice; B). Full-length western blots to show PKG-I protein levels in brown adipose tissue from LF or HF fed WT mice; and C). Full-length western blots to show PKG-I protein levels in skeletal muscle from LF or HF fed WT mice by immunoblotting.

**A). Full-length blots of CD47 in brown fat**

**B). Full-length blots of PKG-1 in brown fat**

**C). Full-length blots of PKG-1 in muscle**
