

Figure S2

Legend: Supplementary Figure S2

Conservation of archaeal and eukaryotic nucleosome profiles. The profiles of nucleosomes assembled on a 5 Kbp region of the *M. thermautotrophicus* genome (nucleotides 28,000 to 33,000 in the genome annotation [<http://archaea.ucsc.edu>] **(a)** in vivo, **(b)** in vitro by methanogen histones, and **(c)** in vitro by chicken histones.
