

S2 Fig.

S2 Fig. Effect of ComboDT on cell growth. WT, *pka1Δ* and *sty1Δ* cells were diluted into culture medium +/- ComboDT (50 nM myriocin + 150 nM rapamycin = 60 ng/ml myriocin + 46 ng/ml rapamycin) and grown as described for a CLS assay. Absorbance at 600nm (A600 nm) was measured at the indicated times. Average values for three cultures are show.
