<tr>
<td><strong>Purpose</strong></td>
<td>To characterize local governmental public health infrastructure and practice in the U.S.</td>
</tr>
<tr>
<td><strong>Description</strong></td>
<td>The National Profile of LHDs is the only comprehensive survey administered to every LHD in the U.S. It collects a wide variety of data related to LHD infrastructure and practices.</td>
</tr>
<tr>
<td><strong>Data Format</strong></td>
<td>Stata</td>
</tr>
<tr>
<td><strong>Restrictions</strong></td>
<td>Expected to be available in August 2006; Data use policy available on NACCHO Web site.</td>
</tr>
<tr>
<td><strong>Price Information</strong></td>
<td>Cost ranges from $200 - $2,000, depending on type of data requested. NACCHO has a process for requesting a fee waiver for researchers without grant support. See Profile Web site (<a href="http://www.naccho.org/topics/infrastructure/2005Profile.cfm">http://www.naccho.org/topics/infrastructure/2005Profile.cfm</a>)</td>
</tr>
<tr>
<td><strong>Method/Technique</strong></td>
<td>Web-based survey directed to primary NACCHO contact. Self-reported data.</td>
</tr>
<tr>
<td><strong>Sample Design</strong></td>
<td>Every LHD in the U.S. received the core questionnaire. Random samples of approximately 520 LHDs (stratified by size) received each of the three modules</td>
</tr>
<tr>
<td><strong>Sample Size</strong></td>
<td>Study population = 2844; number of responses = 2300</td>
</tr>

Data Harmonization

The Data Harmonization Advisory Committee consists of members from the Public Health Systems Research (PHSR) community including:
- NACCHO,
- ASTHO
- NALBOH,
- Local, state and federal Systems researchers,
- Academic Institutions.

Primary goal of the Committee:
- To review the primary data survey instruments used by NACCHO, ASTHO and NALBOH
- To collect program activity data, governance and population data of local and state
- Governing bodies of health throughout the nation.

Collaboration will help to achieve:
- Create internal consistency across the surveys
- Support the validity and reliability of the survey instruments used to collect data.

The product will provide:
- Standardized definitions of common words and phrases used within each survey-Data Dictionary
- A clearer depiction of the organizational structure and populations served by local and state governing bodies will also become evident.
- Efforts of this group will contribute to the rebuilding of a solid public health infrastructure.
### Data Harmonization

#### Synoptic Overview: Survey Question & Response Comparisons

**Organizational Structure/Governance Responsibilities**

<table>

</table>
| 1. Where is the state public health agency located within state government?  
2. Cabinet level agency  
   - Yes, No, N/A  
3. Direct reporting to the governor?  
   - Yes, No, N/A  
4. How is public health represented in the following agencies?  
   - State social service agency  
   - State aging agency  
   - State environmental agency  
   - State natural resources agency  
   - State agriculture agency  
   - State recreation & parks  
   - State transportation  
   - Public health labs  
5. Who is the primary statutory public health authority within your state?  
   - Governor  
   - State board of health  
   - State health official  
   - HHS secretary or other super agency/umbrella | 1. Do you have a local board of health?  
2. If yes, what its functions?  
   - governing  
   - policy making  
   - advising  
3. If yes, how are your board of health members selected?  
   - elected by the public to serve  
   - entirely comprised of elected officials  
   - appointed by local officials  
   - none  
4. What is the governing body for your LPHA?  
   - County Commission or council  
   - City or Town council  
   - Local board of health  
   - State health agency  
   - other | 1. Is your board of health affiliated with a local health department?  
2. Select all applicable functions or activities for which your board has responsibility and/or statutory authority |
Data Harmonization

Future Project Goals

- Data Dictionary
- Delineation of Core Functions
- Joint Product Placement
- Dissemination and Storage of data and datasets
