Clayton Geralds runs a commercial hay farm in Hart County near Munfordville, Kentucky. His total farm size is 630 acres, 350 of which are leased. The focus of his operation is producing small square bales for the horse market. Clayton currently grows a range of forage species including 500 acres of alfalfa and alfalfa/orchard grass and 130 acres of timothy and orchard grass. On average he puts up 80,000 small square bales a year. Clayton is one of the best hay producers in the state and 2008 won the Charlie Schnitzler Producer Award at the 28th Annual Kentucky Alfalfa Conference. In his presentation Clayton will discuss equipment he utilizes for establishing, maintaining, and harvesting top quality horse hay. He will also provide an overview of his expectations for yield and quality of his product as well as proper input and storage requirements.
