So, Who Has the WPA Historical Records Survey Publications?

The ASERL Center of Excellence for the Works Progress/Work Projects Administration at the University of Kentucky

Presentation by Sandra McAninch (mcaninch@uky.edu), Regional Depository Librarian, University of Kentucky Libraries, at the American Library Association Annual Conference, Las Vegas, NV, June 30, 2014
History of UK’s COE

- 2007: Assoc. of SE Research Libraries (ASERL)’s Collaborative Federal Depository Program (CFDP) Steering Committee starts meeting to design Center of Excellence (COE) project
- 2008: UK volunteers to be COE for Works Progress Admin. (WPA)--our WPA inventory begins
- 2009: ASERL receives a 3-year IMLS National Leadership Grant to support ongoing development of ASERL CFDP Centers of Excellence project--WPA cataloging begins at UK
- 2010: UK signs Memorandum of Understanding (MOU) as COE for the WPA--collection development/evaluation begins at UK for WPA
Goals of the CFDP

- Create “Centers of Excellence” at depositories to ensure multiple, complete retrospective collections by agency
- Collections will be supported by subject matter experts, able to provide sophisticated, in-depth reference services
- Work within USC Title 44, including respect for the Regional depository library model
UK’s COE Responsibilities

- Inventory and evaluate holdings for WPA
- Catalog each WPA item
- Create a bibliography of all WPA titles, owned and not owned
- Add WPA records to the ASERL COE database
- Fill gaps to ensure comprehensive collection
- Make materials available via ILL
- Digitize
- Promote the use of the collection
Examples of WPA Publications

plane; but the basement flooring is nearly hard pressed earth, an arrangement common in houses built around 1800. The kitchen and servants' quarters are in a separate building close to, but detached from the house. The original smoke house, made of logs, is in good condition.

The interior of the house, although bearing the signs of age, shows its early elegance. It was furnished by a resident cabinet-maker who fashioned most of the pieces from designs brought over from England. The hand-carved woodwork probably ranks with the best found in Kentucky. Each principal room is equipped with a fireplace, but no two mantels are alike, indicating the skill of the craftsmen who carved the graceful sunbursts, leaves and other ornamentation. The ceilings are unusually high and this feature is accentuated by the lack of cornices. The walls in each room are bare, relieved only by a wood dado, or wainscot, of panelled design, a few feet above the floor.

Gideon Shryock, architect for the dwelling, was born in Lexington, Kentucky, November 15, 1805, the son of Mathias Shryock, a builder and contractor. At the age of twenty-one he went to Philadelphia to study under William Strickland, the most noted architect and civil engineer in the United States at that time. Shryock gave to Kentucky many beautiful buildings which rank in design with the national capital at Washington and other noted structures.
