**Comments**

- Avoid heavy spring and summer N fertilization
- Apply anytime according to soil test
- Remove no more than 1/3 to 1/2 leafage each mowing
- Water deeply as necessary
- Control broadleaf weeds
- Crabgrass pre-emergence control. Second application may be needed (May-June)
- Crabgrass post-emergence control
- Apply prior to egg hatch
- Apply during early instar development
- Seed after soil tillage
- Slit seed or verticut prior to seeding
- Can obtain quick establishment and aesthetics
