1.0 Introduction and Overview

Delays associated with incidents and accidents on heavily traveled highways have been recognized as a major inconvenience and a burden on the driving public. Heavy traffic volumes on interstates in Kentucky result in significantly increased probability for delay occurrences. When there is an occurrence which disrupts traffic, the adverse effects are widespread. High volumes of trucks use the north-south corridors in the state and delays can produce significant costs to both shippers and users of products being shipped.

Many efforts are underway to address the problems associated with congestion: including improved traffic management techniques and applications of advanced technology. A primary element of emergency response is the level of communication and coordination when an incident occurs. Considerable attention has been given to the needs of improved interaction between the responsible agencies when there is an incident or accident requiring coordinated response. At-scene coordination can be a positive aspect of emergency response when a comprehensive plan is in place to address the lines of authority and procedures for responding to the emergency.

The objectives of this project were the following: 1) to develop and implement an emergency response management review process to document currently used procedures in Kentucky; 2) to recommend alternative procedures for emergency response which focus on the need to improve accident investigation and clearance processes; 3) to identify the responsible agencies and personnel in the line of authority for emergency response; 4) to develop and present workshops for emergency response personnel related to prompt clearance of accident/incident scenes; and 5) to develop a set of detour maps for interstates and parkways, including a directory of emergency response personnel.

The following work tasks were undertaken to accomplish the objectives of the project.

Task 1. Review of Literature

Available literature was reviewed to determine the sources of information which addressed the areas of interest related to emergency response. Included were excerpts from the Federal Highway Administration’s “Incident Management Handbook”, which served as a primary component of the workshop presentations. Previous work conducted by the Transportation Center related to accident investigation procedures using total stations and accident clearance times were summarized and incorporated into the workshop presentations. Additional reviews were conducted of the Kentucky Revised Statutes and the Kentucky Administrative Regulations related to legal authority for road clearance and emergency response. In addition, the Kentucky Emergency Operations Plan was reviewed, condensed, and incorporated into the workshop.

Task 2. Develop Accident/Incident Case Studies

A series of accident/incident case studies were documented and included in the workshop.
presentation. Included were 17 sites selected because of special conditions related to road closures and examples of both appropriate and inappropriate responses by emergency personnel.

Task 3. Development of Procedures for Emergency Response

An attempt was made to document the emergency response procedures used by other states and those procedures recommended by the Federal Highway Administration. The objective was to identify appropriate procedures and include those procedures in the workshops. Example memorandums of understanding were obtained from several other states and reviewed for potential adoption in Kentucky. Included were recommended procedures for emergency removal of vehicles from roadways following incidents and accidents.

Task 4. Development and Presentation of Emergency Response Workshops

A series of four workshops were presented in Frankfort, Bowling Green, Louisville, and Florence with attendance of approximately 250. The workshops attracted a wide range of emergency response personnel representatives including local fire, police, and EMS; Kentucky Transportation Cabinet; Kentucky State Police; Disaster and Emergency Services; Fire Marshal’s Office; and others. An emphasis was placed on the need to include Transportation Cabinet personnel in the emergency response process and improve communication between them and others involved in the response to incidents and accidents.

Task 5. Develop Detour Maps for Interstates and Parkways

A set of detour maps for all interstates and parkways were prepared for use as guidance in the determination of appropriate routes to use when a segment of the route is required to be closed because of an incident or accident. Maps and detour explanations were prepared and then distributed to central office and district personnel of the Department of Highways for comments and suggested revisions. In addition, a comprehensive list of emergency response personnel was prepared and included on each detour map for reference when needed during an emergency.

The primary recommendation from the project was improved communication between first responders and others involved in the emergency response process. As a means of formalizing this improved level of communication, a recommendation was made for the development of a memorandum of understanding between the Transportation Cabinet and police agencies who are typically the first on-scene responders in most areas of Kentucky.

As a means of implementing the results of the project, the four previously mentioned workshops were conducted. In addition, a final report on the project was prepared which included the information presented at the workshops, along with detour maps and the directory of emergency response personnel. The reports were disseminated to selected personnel in the central offices and the districts for the Transportation Cabinet, the Kentucky State Police, and Disaster and Emergency Services.
GUIDELINES FOR INCIDENT MANAGEMENT
INCIDENT MANAGEMENT

IMPACT OF INCIDENT
- Delay increases geometrically with time to clear an incident.
- Allowing a stalled vehicle to block a lane for a half hour rather than 15 minutes can result in four times the delay to motorists.

INCIDENTS AND SECONDARY ACCIDENTS
- 13% of all peak period accidents on one freeway were caused by a previous incident.
- 20% to 30% of freeway pedestrian fatalities are a result of disabled vehicles.

CAPACITY REDUCTION ON THREE LANE FREEWAY

<table>
<thead>
<tr>
<th>INCIDENT TYPE</th>
<th>PERCENT REDUCTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stall (One Lane Blocked)</td>
<td>40%</td>
</tr>
<tr>
<td>Non-Injury Accident (One Lane Blocked)</td>
<td>50%</td>
</tr>
<tr>
<td>Accident (Two Lanes Blocked)</td>
<td>70%</td>
</tr>
<tr>
<td>Accident on Shoulder</td>
<td>20%</td>
</tr>
</tbody>
</table>

TIME FACTOR IN INCIDENTS
- For each minute the time to clear blocked lanes is reduced, a motorist's delay is reduced by four or five minutes.

INCIDENT TYPES
- PREDICTABLE
  - Maintenance activities
  - Construction
  - Special events (ball games, parades)
INCIDENT TYPES

UNPREDICTABLE
- Accident
- Stalled Vehicle
- Weather
- Spilled Load
- Road Failure

FOCUS OF INCIDENT MANAGEMENT PROGRAMS

REDUCE:
- Time to Detect Incident
- Time to Identify the Nature of the Incident
- Time to Respond With Appropriate Personnel and Equipment
- Time to Clear Incident and Restore Roadway Capacity
- Traffic Demands During the Incident

VERIFICATION

Determine Precise Location and Nature of Incident and Communicate Information to Appropriate Agencies

FACTORS INFLUENCED BY INCIDENT MANAGEMENT TECHNIQUES

- Reduced Capacity Past the Incident
- Incident's Total Duration

DETECTION

Determine Incident has Occurred With Information to Location Where Response Can be Initiated

RESPONSE

Activate, Coordinate, and Manage Appropriate Personnel, Equipment, and Communication Links and Motorists Information as Soon as There is Reasonable Certainty That an Incident is Present.
**Removal/Restoration of Capacity**
Removal of Wreckage from Roadway, Investigate Incident, and Restore Capacity to Pre-Incident Condition.

**Information to Motorists**
Activate Various Means of Communicating Site Conditions to Motorists.

**Detection**
- Electronic Detection
- Enforcement Patrols
- Highway Agency Personnel
- Service Patrols
- Fixed Observers
- Private Carriers
- Commercial Traffic Reporters
- Aerial Surveillance
- Motorists
  - Call Boxes
  - Cellular Telephone
  - CB Radio

**Traffic Management**
Application of Appropriate Traffic Control Measures.

**Objectives of Incident Management Measures**
- Reduce Duration
- Detection
- Verification
- Response
- Restore/Maintain Capacity
- Removal
- Reduce Demand
- Information to Motorists
- Traffic Management

**Verification**
- Obtain Information From
  - Enforcement Patrols
  - Courtesy Patrols
  - Service Patrols
  - Closed-Circuit TV
  - CB Radio
  - Traffic Reporters
  - Aerial Surveillance
  - Cellular Telephone
  - Emergency Call Boxes
- Display/Record Information
- Communicate to Appropriate Agencies
RESPONSE
- Pre-Planning
- Enforcement Agencies
- Response Teams
- Service Patrols
- Fire, Medical, Environmental, Maintenance
- Inter-Agency Communication
- Specialty Teams (Hazmat)
- Tow Truck Agreements
- Commercial Pager
- Strategic Location of Materials and Equipment

INFORMATION TO MOTORISTS
- Diversion Information
  - Variable Message Sign
  - Highway Advisory Radio
  - Commercial Pager
  - Media Outlets

TRAFFIC MANAGEMENT TEAM
- Elected Officials
- State DOT
- County/City DOT
- Transit Operators
- Local Jurisdictions
- Police Departments
- Highway Patrol
- Independent Authorities
- Fire, Rescue
- Emergency Services
- Environmental Protection Agencies
- Towing Services
- Media

REMOVAL
- Appropriately Equipped Response Vehicles
- Training of Response Personnel
- Service Patrols
- Off-Freeway Accident Investigation Sites
- Push Bumpers
- Defer Removal Until Off-Peak
- Rapid Removal Policies

TRAFFIC MANAGEMENT
- On-Scene Traffic Management
  - Lane Closure/Reopening
  - Freeway Closure/Reopening
- Implement Pre-Planned Alternate Routes

PROJECT INITIATION
- Establish Traffic Management Team
- Summarize Need for Established Incident Management Policy
- Regular Meetings of Traffic Management Team
- Prepare Memorandum of Understanding
- Establish Major Action Items
ACTION ITEMS

- Define Roles/Responsibilities
- Identify Legal Issues and Need for Inter-Agency Agreements
- Adopt Task Force Procedures
- Establish Inter-Agency Communication Contact Points
- Identify Available Resources
- Study Other Incident Management Programs
- Identify Needed Improvements in Current Procedures
- Identify New Incident Management Techniques
- Identify High Priority Tasks
- Document Recommendations

REQUIREMENTS OF EFFECTIVE DETECTION/VERIFICATION SYSTEM

- Means of Detecting or Sensing Incident
- Focal Operations Center
- Communication Links
- Means of Display and Recording

REQUIREMENTS OF EFFECTIVE RESPONSE PLAN

- Inter-Agency Coordination
- General Approach to Managing Incidents
- Working Relationships Among Agencies
- Communication Links Between Agencies
- Detailed Procedures
- Post-Incident Critiques

OVERCOMING IMPEDIMENTS

- Acceptance of Team Approach
- Written Agreements of Understanding for Various Agencies
- Joint Development of Coordination Plan
- Information on Extent of Problem and Potential Benefits
- Continued Information and Communication

DETECTION/VERIFICATION TECHNIQUES

- Motorist Cooperative Media
  - Use Call Boxes, CB, Cellular Telephone
  - Commercial Traffic Information
- Fleet Operators
- Patrol Vehicles
- Service or Courtesy Vehicles
- Fixed Observers
- Aerial Surveillance
- Electronic Surveillance
- Closed-Circuit Television
- Automatic Vehicle Identification

RESPONSE PLAN

- Define Roles of Responding Agencies
- Describe Inter-Agency Communication Links
- Detailed Procedures
- Resource Flows
- Describe Logistics
- List Participating Agencies, Contacts, and Telephone Numbers
INTER-AGENCY COMMUNICATIONS LINKS

- Telephone
- Leased Telephone Line
- Dedicated Owned Cable
- Commercial Pager
- Radio
- Data Modem

HAZARDOUS MATERIALS PLAN

- Response at Site
  Information to be Gathered
  Communications
  Securing the Scene
- Response at Central Command Post

PRIVATE WRECKER SERVICES

- Rotation Lists
- Contractual Agreement

RESPONSE SERVICES

- Service Patrol
- Courtesy Patrol
- Police Patrol

REMOVAL

- Objective to Clear Roadway and Adjoining Areas with Minimum Disruption of Traffic Stream
- Pre-Planning Using List of Possible Scenarios

OPTIONS FOR PROVIDING INCIDENT REMOVAL RESOURCES

- Tow Trucks
- Heavy-Duty Wreckers
- Service Patrol
- Police Patrol
ACCIDENT INVESTIGATIONS
- Sensitivity to Traffic Flow
- Alternate Data Collection Techniques
- Investigations Off the Freeway
- Removal of Vehicles and Dispatching of Wreckers

DATA COLLECTIONS USING TOTAL STATIONS
- Collect More Data
- Reduce Data Collection Time
- Reduce Personnel Requirements
- Reduce Motorist Delay

ACCIDENT INVESTIGATION SITE
- Reduce Motorists Delay
- Reduce Vehicle Operation Costs
- Reduce Secondary Accidents
- Reduce Pedestrian Accidents
- More Efficient Use of Personnel

ORDINANCES RELATING TO INCIDENT REMOVAL
- Stopping After Accident Without Obstructing Traffic More Than Necessary
- Use of Accident Investigation Sites
- Moving Vehicles from Roadway Into Safe Refuge

TRAFFIC MANAGEMENT PRE-PLANNING
- Scene Management
- Alternate Route Planning
- Traffic Control Guidelines
- Timing of Removal
- Special Event Planning

REQUIREMENTS FOR INCIDENT SCENE MANAGEMENT
- Establish Command Post
- Appoint Scene Manager
- Prior Training
- Designate Agency Representatives
POST-INCIDENT CRITIQUES

- Recreate Incident Chronology
- Ask Each Agency for Positive and Negative Aspects
- Encourage Suggestions for Improvements
- Discuss Issues That Arise
- Document Results

TRAFFIC FLOW TECHNIQUES

- Increase Capacity Past Incident Site
- Reduce Demand on Roadway Affected by Incident

SPECIAL EVENT PLANNING

- Identify Major concerns
- Assemble Representatives from Participating Agencies
- Assess Impact of Event on affected Roadways
- Prepare Traffic Management Measures
- Implement Plan
- Evaluate Plan

METHODS TO MAINTAIN TRAFFIC THROUGH INCIDENT SCENE

- Use Shoulder
- Merging Techniques
- Controlling Traffic Through Frontage Road Intersections
- Contraflow Operations

TECHNIQUES TO PROVIDE INFORMATION TO MOTORISTS

- Signing
- Highway Advisory Radio
- Commercial Radio
- Print Media
- CB Radio
- Cable Television
- Cellular Telephone
- Pager
- In-Vehicle Route Guidance

STEPS TO DEVELOP ALTERNATE ROUTE PLAN

- Assemble and Index Data
- Establish Alternate Route Criteria
- Identify Preliminary Alternate Routes
- Drive and Videotape Preliminary Alternate Routes
- Revise Preliminary Alternate Routes
- Identify Problem Areas
- Identify Commercial Vehicle Restrictions
- Determine Signing
- Assess Highway Advisory Radio
- Develop Operational Procedural Guide for Termination of Alternative Routes
- Develop Notification Procedure
- Estimate Costs
### EVALUATION
- Estimate Existing Incident-Caused Delay
- Calculate Expected Reductions in Delay
- Determine Value of Time and Vehicle Operating Costs
- Determine Cost Savings Due to Reducing Delay
- Estimate Costs
- Calculate Benefit/Cost Ratio

### PROMOTIONAL STRATEGIES
- Press Releases
- News Conferences
- Public Service Announcements
- Freeway Signing
- Informational Brochures
- Videotapes
- Use of Public Access Cable TV
- Use Public Relations Agency

### HAZARDOUS SPILL INCIDENTS
- Fire and Rescue Agencies
- State, City and County Police
- State and Local Roadway Agencies
- Media Representatives

### INCIDENT MANAGEMENT TEAM
- Arrive at Decisions for Problems Relating to Coordination and Utilization of Resources
- Coordinate Each Agency's Role
- Ensure Safety of Agency Participants and General Public
- Coordinate Media Information Releases

### HAZARDOUS MATERIAL INCIDENT ROLE OF FIRE DEPARTMENT
- Provide Command Level Person for Team
- Identify Hazardous Materials
- Identify Area of Isolation and Evacuation
- Request Clean-Up and Containment of Resources
- Aid the Injured

### HAZARDOUS MATERIAL INCIDENT ROLE OF POLICE
- Provide Command Level Person for Team
- Establish Agency Command Post
- Isolate the Incident
- Designate Incident Command Center
- Control of Crowd and Traffic
- Identify and Implement Alternate Routing
- Conduct Investigation to Determine Cause
ACCIDENT INVESTIGATION PROCEDURES

USING TOTAL STATIONS
EVALUATION OF ADVANCED SURVEYING TECHNOLOGY FOR ACCIDENT INVESTIGATION
KENTUCKY TRANSPORTATION CENTER
UNIVERSITY OF KENTUCKY

POTENTIAL BENEFITS
- Decreased Data Collection Time
- Increased Data Accuracy
- Reduced Risks To Investigators
- Data Analysis Easier

POTENTIAL DISBENEFITS
- Increased Equipment Costs
- Increased Training Requirements
- Weather-Related Delays
- Limited Availability of Equipment and Trained Operators

ON-SCENE INVESTIGATION ALTERNATIVES
- Coordinate Procedure
- Electronic Surveying Equipment

BENEFITS OF DECREASING DATA COLLECTION TIME
- Reduced Traffic Delay
- Decreased Fuel Consumption
- Decreased Pollutant Emissions
- Reduced Potential for Secondary Accident

TRADITIONAL COORDINATE METHOD
- Use Tape or Measuring Wheel
- Use Reference Line and Reference Point
- Two Measurements to Locate Spot
ELECTRONIC SURVEYING EQUIPMENT

- Total Station Replaces Tape or Measuring Wheel
- Data Stored Digitally Rather Than in Field Book
- Computer Plots of Data Rather Than Hand Prepared Drawings

MEAN DATA COLLECTION TIME (MIN)

<table>
<thead>
<tr>
<th>Method</th>
<th>KSP</th>
<th>LFUCG</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coordinate Method</td>
<td>214</td>
<td>188</td>
</tr>
<tr>
<td>Total Station Method</td>
<td>111</td>
<td>124</td>
</tr>
</tbody>
</table>

CONCLUSIONS

- Number of Measurements Increased by Factor of Two
- Time to Collect Data Decreased by About 33 Percent
- Man Hours Decreased by About One Half
- More Accurate and Detailed Investigation

EQUIPMENT

- Surveying System
- Computer Software
- Plotters

KSP ACCIDENTS USING BOTH PROCEDURES

<table>
<thead>
<tr>

KY STATUTES RELATED TO ACCIDENT CLEARANCE AND ROAD CLOSURES
KENTUCKY STATUTES RELATED TO ACCIDENT CLEARANCE AND ROAD CLOSURES

KRS 39.409 Emergency Powers of Governor, Mayors, and County-Judges Executive

Governor can Declare Emergency Powers Under Conditions of Blizzard, Deep Snow and Icy Highways.

KRS 189.231 Restriction and Regulation of Traffic

- Secretary of Transportation May Install and Maintain Traffic Control Devices to Promote Safety of Traveling Public
- Secretary of Transportation May Restrict or Regulate Traffic to Promote Safety of Traveling Public

KRS 39.415 Local Governments to Establish Organizations

- Each County or City Shall Establish a Local Organization for Disaster and Emergency Preparedness and Response
- Areawide Plan May be Adopted in Lieu of City or County Plan

KRS 39.416 City and County Disaster and Emergency Response Powers

- Mayor or County Judge-Executive May Declare State of Emergency
- Appoint, Employ or Remove Emergency Response Personnel
- Establish Primary or Secondary Control Center to Serve as Command Center During Emergency

KRS 39.424 Traffic Control Plans Executive Orders

- Control of Traffic During Any Disaster or Emergency
- Control and Alteration of Speed Limits During Disaster or Emergency
- Prohibition or Limitation of Motor Vehicles During Disaster or Emergency

KRS 39.407 Powers of Adjutant General

- To Prepare a Comprehensive Plan and Program for the Disaster and Emergency Response of the State
- To Cooperate With Federal Agencies in Matters Relating to Emergency Response of the Nation
KRS 39.425 Powers of Governor to Lease or Loan State Property and State Employee Emergency Response

- May lend or lease state property and allow state personnel to engage in emergency response activities
- May permit state employees to engage in disaster and emergency response for the Division of DES or local DES

KRS 39.870 State Agency Response

- Agencies of State Government shall respond to the release of hazardous substances in conformance with the State EOP
- If on-scene response is required, State and local agencies shall cooperate with each other and with party responsible for hazardous material release

KRS 70.045 Special Deputies in Emergency

- Sheriff may appoint deputies as necessary to assist in preparation for and during emergency situation

KRS 75.450 Response to Fires

- A fire department responding to a fire or other emergency for nonsubscriber may charge for services.

KRS 189.940 Exemptions from Traffic Regulations

- A privately owned vehicle of a volunteer fireman, not equipped with proper lights and audible devices, is not an emergency vehicle.

KRS 224.01-400 Reportable Quantities and Release Notification Requirements for Hazardous Substances

- Cabinet shall be the lead agency for hazardous material emergency response
- Cabinet shall establish a contingency plan for emergency action in response to hazardous materials
KRS 227.220  Duties of the State Fire Marshal

The State Fire Marshal shall enforce or aid in the enforcement of all laws and regulations relating to fire loss.

KRS 273  Rights and Responsibilities of Fire Department

(Assented by House Bill No. 4)

- Authority to order evacuation of areas endangered by fire, hazardous materials, or other impending disaster that constitutes a threat to life or property.
- Authority to be in charge at scene of a fire or other emergency.
- Control of fire personnel and equipment.
SUMMARY OF KY EMERGENCY OPERATIONS PLAN
Kentucky Emergency Operations Plan (EOP)

**SCOPE**

- Emergency Response to Natural, Technological or War-Related Disasters

**Execution of EOP Conditions**

- Emergency Declared by Governor
- Emergency/Disaster Occurs or is Imminent
- Directed by KY DES Director or Representative

**EOP Responsibilities of State Government**

- Disaster Assistance Provided by the State is to Supplement Relief Provided by Local Governments
- KY DES Area Coordinator is Expected to Coordinate Operations Among Local, State, and Federal Officials

**Kentucky EOP Direction and Control**

- KRS 39-400 Gives Powers to Governor to Declare A State of Emergency
- Line of Succession Following the Governor:
  1. Lt. Governor
  2. President Pro Temp of Senate
  3. Secretary of State

**EOP Responsibilities of Local Governments**

- Providing Mass Care and Coordinating Agencies and Organizations
- In Cooperation with or Assistance of State Government

**EOP Responsibilities of Federal Government**

- Support State and Local Governments in Planning, Preparedness, Mitigation, Response, and Recovery
- Federal Emergency Management Agency Works With State to Coordinate Relief Operations in Case of Major Disaster or Emergency
EOP Cabinet/Department/Agency Responsibilities

- Governor is General Director of All Disaster and Emergency Operations and Can Delegate Authority Vested Under KRS 39.400 Through KRS 39.432

EOP Justice Cabinet Responsibilities

- KY State Police is Primary State Agency for Law Enforcement Operations and Coordination, in Addition to Maintenance of Traffic Control

EOP Natural Resources and Environmental Cabinet Responsibilities

- Provides Emergency Environmental Technical Services
- Provides Technical Assistance for Hazardous Material Emergencies

EOP Department of Military Affairs Responsibilities

- KY National Guard Will Support State and Local Agencies in Disaster and Emergency Operations
- Division of DES is Lead Agency for Disaster/Emergency Response Planning and Response Coordination

EOP KY Transportation Cabinet Responsibilities

- Coordination of Transportation Resources, Through Emergency Transportation Service
- Department of Highways Coordinates Public Works Resources During Emergency Conditions
- Department of Vehicle Regulation Provides Support Services for Law Enforcement, Communications, Warning, and Radiological Monitoring

EOP State Fire Marshal's Office Responsibilities

- Coordination of Fire Services and Training
- Overall Control for Determining Which Fires to Fight
ANNEX Q
Hazardous Materials
- Provides framework for actions to be taken when hazardous materials cause an emergency or disaster
- DES Will Coordinate Activities Related to Hazardous Materials Emergency
- Unified Command System Will Be Used to Issue Decisions Based on Joint Consultations of Multi-Jurisdictions or Functional Areas
- Senior DES Officer Will be the On-Scene Incident Coordinator Responsible for Managing Response

ANNEX Q
Hazardous Materials
- First State Agency on Scene is to Assume Operational Control Until On-Scene Coordinator Arrives
- Department of Highways Is Responsible for Clean Up, Directing Traffic, Recruiting and Assisting Police at Scene
- Division of Motor Vehicle Enforcement is Responsible for Security, Traffic Control, Communications, and Evacuation
- State Fire Marshall is Responsible for Directing Operations Related to Hazards of Fire and Explosion

ANNEX Q
RESPONSIBILITIES of THE DEPARTMENT OF HIGHWAYS
- Debris cleanup
- Direct and re-route traffic, in cooperation with police
- Provide traffic control devices
- Under supervision of NREP Cabinet, divert liquids from streams and sewers

ANNEX Q
RESPONSIBILITIES of DIVISION OF VEHICLE ENFORCEMENT
- Provide security and traffic control
- Provide communications assistance
- Assist with warning and evacuation

MEMORANDUM OF UNDERSTANDING
- Could help address the problem of unstructured communications between first responders and Transportation Cabinet
- Other states have used MOU's to provide for emergency removal of vehicles

MEMORANDUM OF UNDERSTANDING (continued)
- Recommended areas to include:
  - Designate and manage detours
  - Emergency clean-up and removal of materials from roadway
  - Emergency removal of vehicles from roadway
SUMMARY OF ACCIDENT/INCIDENT

CASE STUDIES
SUMMARY OF CASE STUDIES

Miscellaneous Sites
1. I-75 Rockcastle Co. (10-26-94); tractor trailer ran off road hauling hydrofluoric acid; road closed 3 days, 5 hours
2. I-65 Barren Co. (1-1-95); vehicle crossed median resulting in four fatalities; road closed 5 hours
3. US 431 Logan Co. (2-28-95); fatal accident involving tanker overturning and spilling diesel fuel; road closed 14 hours initially plus 33 hours for cleanup
4. I-64 Clark Co. (7-26-95); fatal accident involving coal truck impacting rear of escort vehicle behind a wide load; road closed for 11 hours
5. I-71 Carroll Co. (10-27-95); tractor trailer overturned, spilling para-cresol; road closed 6 hours
6. I-71 Henry Co. (6-17-96); propane storage tank leakage adjacent to I-71; road closed 15 hours
7. I-65 Hart Co. (10-10-85); collision of two trucks hauling military explosives and corrosive materials, road closed 6.5 hours
8. I-75 Whitley Co. (7-6-95); tractor trailer overturned on exit ramp; road closed for 2 hours
9. I-65 Hardin Co. (6-19-96); tractor trailer hauling unknown chemical overturned
10. I-75 Kenton Co. (94-21-95); tanker truck hauling butyl aldehyde developed leak; road closed 6.5 hours

Fayette County
1. KY 418 (10-10-93); fatal accident with opposite direction impact involving auto, van, and pickup; road closed 4 hours
2. I-75 (5-19-92); 11 vehicle accident involving fuel spill and slippery surface resulting in 2 fatalities and 10 injuries; road closed 7 hours

Jefferson County
1. I-64 (9-25-94); tractor trailer vaulted over barrier wall; road closed 8 hours
2. I-65 (5-18-94); two tractor trailers collided, resulting in fire burning cargo of pesticides; road closed 26 hours

Northern Kentucky
1. I-75 (2-11-93); fatal accident involving tractor trailer impacting disabled pickup on Brent Spence Bridge; road closed ?
2. I-75 (11-22-93); rear end collision in work zone and traffic diverted into rest area; road closed 3 hours

Cincinnati
1. I-471 Cincinnati (6-4-92); tanker truck hauling gasoline overturned onto auto and ignited in downtown area; road closed 10 hours and ramp closed 2 days
CASE STUDY NO. 1

LOCATION: I-75, Rockcastle County

DATE: October 26, 1994

ACCIDENT DESCRIPTION: Single vehicle ran-off-road involving tractor trailer hauling hydrofluoric acid.

SEVERITY: Incapacitating

AGENCIES INVOLVED: Kentucky State Police
                    Kentucky DES
                    Kentucky Fire Marshall
                    Natural Resources
                    Federal EPA
                    Kentucky National Guard
                    Kentucky EOC
                    Kentucky Department of Highways
                    Rockcastle County Sheriff
                    Bush Fire Department
                    Mt. Vernon Fire Department

RESPONSE PROCESS:
Time Notified: 6:41 pm (10/26/94)
Scene Cleared: 12:30 am (10/30/94)

I-75 WAS CLOSED FOR 3 DAYS, 5 HOURS

CASE STUDY NO. 2

LOCATION: I-65, Barren County

DATE: January 1, 1995

ACCIDENT DESCRIPTION: Vehicle lost control and crossed median to impact vehicles traveling opposite direction on I-65

SEVERITY: 4 Fatalities

AGENCIES INVOLVED: Kentucky State Police
                    Cave City Police
                    Park City Police
                    Cave City Fire Department
                    Park City Fire Department
                    Kentucky Department of Highways

RESPONSE PROCESS:
Time Notified: 9:08 am
Scene Cleared: 2:32 pm

I-65 WAS CLOSED FOR 5 HOURS, 9 MINUTES
CASE STUDY NO. 3

LOCATION: US 431 - Logan County

DATE: February 28, 1995

ACCIDENT DESCRIPTION: Single vehicle involving tanker hauling diesel fuel

SEVERITY: Fatal

AGENCIES INVOLVED: Logan County Sheriff 
Natural Resources 
DES 
Kentucky Department of Highways 
Private Towing Company 
Hazardous Waste Contractor

RESPONSE PROCESS: Time Notified: 11:54 am (2/28/95) 
Scene Cleared: 2:30 am (3/1/95) 
Cleanup Completed: 1:30 pm (3/3/95)

ROAD CLOSED INITIALLY FOR 14 HOURS, 36 MINUTES TO REMOVE VEHICLE. INTERMITTENT CLOSURE OVER 33 ADDITIONAL HOURS TO COMPLETE CLEANUP.

KENTUCKY TRANSPORTATION CENTER

CASE STUDY NO. 4

LOCATION: I-64 Clark County

DATE: July 26, 1995

ACCIDENT DESCRIPTION: Tractor trailer impacted rear of escort vehicle following over-size load

SEVERITY: Fatal

AGENCIES INVOLVED: Kentucky State Police 
Clark Co. Fire and Rescue 
Tow companies

RESPONSE PROCESS: Time Notified: 9:30 am 
Scene Cleared: 8:30 pm 
Total Time: 11 hours

KENTUCKY TRANSPORTATION CENTER
CASE STUDY NO. 5

LOCATION: I-71 Carroll County
DATE: October 27, 1995
ACCIDENT DESCRIPTION: Tractor trailer left road and overturned, resulting in spill of 5,000 gallons of para-cresol
SEVERITY: Incapacitating injuries
AGENCIES INVOLVED: Kentucky State Police
Carroll County Rescue
State Fire Marshall’s Office
Tow companies
RESPONSE PROCESS: Time Notified: 3:09 am
Scene Cleared: 9:01 am
Total Time: 6 hours

CASE STUDY NO. 6

LOCATION: I-71 Henry County
DATE: June 17, 1996
ACCIDENT DESCRIPTION: Propane gas storage tank began to leak and caught fire, resulting in closure of adjacent section of I-71
SEVERITY: No injuries
AGENCIES INVOLVED: Newcastle Fire Department
State Fire Marshall’s Office
Motor Vehicle Enforcement
Department of Highways
DES
Dow Coming
RESPONSE PROCESS: Time Notified: 10:52 am
Scene Cleared: 2:14 am
Total Time: 15 hours
CASE STUDY NO. 7

LOCATION: I-65 Bonnieville, Hart County
DATE: May 10, 1985
ACCIDENT DESCRIPTION: One-ton truck pulling a small trailer loaded with military explosives impacted rear of tractor pulling double trailers containing corrosive materials, resulting in a fire.
SEVERITY: Incapacitating injuries
AGENCIES INVOLVED: Kentucky State Police, State Fire Marshall’s Office, DES, Natural Resources Department of Highways, Bonnieville Volunteer Fire
RESPONSE PROCESS: Time Notified: 3:28 am
Scene Cleared: 10:00 am (Evacuation ended 2:45 pm)
Total Time: 6.5 hours

CASE STUDY NO. 8

LOCATION: I-75 Whitley County
DATE: July 6, 1995
ACCIDENT DESCRIPTION: Tractor trailer overturned on ramp exiting I-75
SEVERITY: No injuries
AGENCIES INVOLVED: Williamsburg Police, Owens Towing
RESPONSE PROCESS: Time Notified: 5:04 am
Scene Cleared: 7:05 am
Total Time: 2 hours
CASE STUDY NO. 9

LOCATION: I-65 Hardin County
DATE: June 19, 1996
ACCIDENT DESCRIPTION: Tractor trailer hauling unknown chemical ran off road and overturned
SEVERITY: Incapacitating injuries
AGENCIES INVOLVED: Kentucky State Police
Elizabethtown Fire
DES
Natural Resources - Division of Water
State Fire Marshall's Office
Contractor for land cleanup
Nalls Wrecker
RESPONSE PROCESS: Time Notified:
Scene Cleared:

CASE STUDY NO. 10

LOCATION: I-75 Kenton County
DATE: April 21, 1995
ACCIDENT DESCRIPTION: Tanker truck carrying butyl aldehyde developed leak while traveling northbound on I-75; stopped resulting in minor contamination of adjacent area.
SEVERITY: Minor injuries to family of four from inhaling fumes
AGENCIES INVOLVED: Fort Wright Police
Covington Fire
Cincinnati HAZMAT
Superior Carriers
RESPONSE PROCESS: Time Notified: 8:37 pm
Scene Cleared: 3:10 am
Total Time: 6.5 hours
### FAYETTE COUNTY CASE STUDY NO. 1

| LOCATION: | KY 418, Fayette County |
| DATE: | November 10, 1993 |
| DESCRIPTION: | Opposite direction impact involving automobile, van, and pickup. |
| SEVERITY: | Fatal |

EXAMPLE MEMORANDUM OF UNDERSTANDING

FOR

EMERGENCY REMOVAL OF VEHICLES FROM ROADWAY
INTERAGENCY AGREEMENT

MD/SHA-MSP

REMOVAL OF VEHICLES FROM ROADWAY

This agreement made this 26th day of October, 1990, by and between the Maryland State Highway Administration (SHA) and the Maryland State Police (MSP) is to provide guidance for State Police, and State Highway personnel in removing vehicles from roadways in certain situations to maintain a safe and orderly flow of traffic.

WITNESSETH: Whereas, the SHA is proposing to remove certain vehicles from the roadway on an urgent basis following collisions or where vehicles are abandoned and are causing a hazardous situation to exist.

I. General:

Whenever a road or lane is closed or partially blocked by an accident and traffic delays or safety problems may occur, the Resident Maintenance Engineer or his Representative, in cooperation with the police officer in charge, should reopen the roadway as soon as possible ON AN URGENT BASIS. This recognizes that public safety is the highest priority and must be secured, especially if injuries or hazardous materials are involved. It is understood that damage to vehicles or cargo may occur as a result of clearing the road on an urgent basis. While reasonable attempts to avoid such damage should be made, the highest priority is public safety.

II. Procedure/Requirements - SHA

A. General

The Resident Maintenance Engineer or his representative is to assign the necessary equipment and manpower to reopen the road or lane as soon as possible.

If materials being transported are involved, the SHA will make every effort to relocate the materials in the shortest possible time, using whatever equipment is necessary. All such materials will be relocated as short a distance as possible, but not be placed so as to present a traffic hazard.
The Resident Maintenance Engineer or his representative is to prepare a list of the personnel and equipment used and the work hours involved so that the owner of the vehicle and/or cargo can be billed for the work. Appropriate warning devices (barricades, signs, arrowboards, etc.) are to be placed on the scene should either the damaged vehicle(s) or cargo remain adjacent to a lane or on the shoulder.

B. Hazardous/Flammable/Explosive Materials

No attempt is to be made by State Highway Administration personnel/equipment to move any hazardous or flammable or explosive material for any reason. If SHA is first on the scene and cargo content is not readily identifiable, the Resident Maintenance Engineer or his representative will contact the proper authorities to ascertain if special measures should be taken.

As soon as the public safety has been secured then reopening of the roadway is to proceed as described under "GENERAL" in this agreement.

III. MSP Duties and Responsibilities

Members of the Maryland State Police who are the on-scene motor vehicle collision investigators will work in cooperation with other Emergency Service Personnel and members of the MD State Highway Administration who are at the scene.

Members of the State Police will conduct their required investigation in as expedient a manner as possible, considering the severity of the collision and the quality of their investigation. Lengthy investigations will require investigators to work diligently in an attempt to minimize traffic delays. This may mean that certain "non-critical" portions of an investigation be conducted at a later time when traffic congestion is non-existent (i.e., non-peak periods).

It should be understood that as fire and rescue service personnel complete their required tasks of extrication, administration of medical assistance and removal of the injured, the Maryland State Police Officer in Charge may choose to release them unless a HAZMAT situation exists.

This will also hold true for allied police personnel, additional troopers and members of the State Highway Administration as each complete their required functions, returning the roadway to normal as soon as possible.
Members of the Maryland State Police shall not unnecessarily cause a delay in the reopening of a roadway in allowing a company to dispatch (an) additional truck(s) for immediate off-loading where this action will result in additional back-ups or hazardous circumstances during peak traffic periods.

IV. Liability Issues

Maryland State Highway Administration's policy for the immediate removal of certain vehicles from roadways on an URGENT BASIS, utilizing available resources, recognizes that public safety is of the highest priority. Furthermore SHA realizes that damage to vehicles or cargo contained therein may occur as the result of their clearing the roadway, and SHA assumes liability under these circumstances for said damage, should that become an issue. SHA's liability under these circumstances would be no greater than they might expect from negligence etc. on the part of snow equipment operations. As outlined in the "Limits of Liability" portion of the MD Tort Claims Act, SHA is only responsible for the first $1,000.00 in damages and the Maryland State Treasurer's office would cover any additional damages under the State's Self-Insurance Program. SHA would not automatically be liable for damages resulting from clearing the roadway unless there was clear evidence on the Administration's part, that negligence was used in said operation.

In Witness Whereof, each party hereto has caused this agreement to be executed in its name and on its behalf by its duly authorized officer or agent as of this day and year first above written.
